

cta architecture + design ltd.

To Whom it May Concern:

CTA architecture + design ltd. is a dynamic and growing architecture firm with plans for expansion across North America and into the United States.

We contracted DOMINION to build an entirely new website for CTA architecture + design ltd. The website is now complete, and we are so proud of what DOMINION created! The process of working together with DOMINION to produce the website we desired was first class. From onboarding to building the site to site launch, we were continually impressed with the quality and creativeness of the DOMINION team. Their response times were lightning fast, and their client care was just superb. They even provided us with the tools to amend our website as the Architectural practice grows and develops.

If you're a professional services firm looking for good value, creativeness, and superb execution in building a new website, hire DOMINION. You won't be disappointed!

Sincerely,

CTA architecture + design Ltd.
