

DBMINER TECHNOLOGY INC.

To Whom It May Concern:

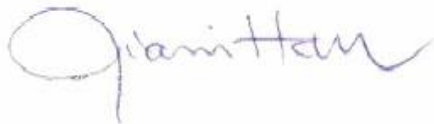

DB Miner Technology Inc. retained DOMINION Sales & Marketing to provide recommendations to increase sales of our DB Miner 2.0 (Enterprise) software product. This high end software program allows “data mining” of large data warehouses and data marts. Our product users include Boeing, Hewlett-Packard, Hughes Research Labs and London Drugs.

The DOMINION team led by Tyler Dawson provided key suggestions for increasing sales of our product. Subsequently, DOMINION produced several marketing pieces to more effectively sell our product. This included the redesign of sales visuals/handouts, creation of a new CD-Label and Jewel Case.

As a direct result of DOMINION’s work, sales of DB Miner 2.0 (Enterprise) have increased substantially. The consulting and design fees we have paid to DOMINION have been recouped many times over.

In summary, it was a pleasure working with Tyler Dawson and his group. We will continue to draw upon their expertise and resources.

Best regards,

Jiawei Han, Ph.D.
President
